### ***UFOs and Metaphysical Crisis (Follow-Up)***

Have you noticed lately that mainstream media outlets are posting a lot more articles on UFOs, even acknowledging that some of the reported sightings by the Navy and pilots are real? It is now being openly stated that UFOs do exist and that they perform in ways that defy all conventional aircraft we have in use today. Of course, the big question is: *Real in what way?* At the moment, UFOs are primarily a phenomenon without a concrete explanation, leading to *public* speculation in an attempt to answer the *what* question.

The other pressing question is: Have the powers that pull the strings (whomever they are) kept their knowledge of UFOs a secret hidden from the public? It's disturbing that governments around the world, especially the US government that was set up to serve the people, deem it necessary to keep so many secrets from the public, often out of some perceived or fabricated threat to national security. It's clear that UFOs have been in this category of national security secrets for decades, some say for 70 years. Of course, the question is whether there are other not-so-honorable, possibly nefarious, motives behind keeping the so-called *threats* secret.

Nevertheless, the speculation focuses not only on the technology but also on who or what has built it and now operates it. Here is a smattering of the speculations:

- Alien technology operated by aliens (ET is here) or by human-alien hybrids
- Reverse-engineered technology from aliens but now operated by humans
- Man-made technology that came out of Nazi Germany at the end of WW2
- Man-made technology developed over many years, kept hidden from the public
- Human time-travelers returning from our future
- Spirit beings (good and bad) from other dimensions transporting through portals
- Man's creators keeping watch, getting ready to reveal themselves to mankind
- It's all an illusion, as if everything is a hologram or within a programmed matrix
- The devil and its demons are behind it all
- The phenomenon is real; but its true nature is unknown (probably the new government stance)

There is supposed to be a report on UFOs submitted to Congress this month and it is already being leaked that the conclusion is close to the last one on the list. But this begs the question: Given all that the world has been through recently, why now? What's up?

As you might suspect, there is a reason for bringing up this topic at this time and it goes back to a word from the Lord on June 24, 2020 and reported in [Metaphysical Crisis](#). Here is what was reported in this insight.

... on **June 24, 2020**, I heard: ***What is coming is a crisis of the metaphysical itself; it is a crisis of what is reality. Warn the people: There is only one reality upon which all is built—it is My Son!*** To this, I asked the question: *How will this crisis manifest? What will trigger the question?* I then heard: ***The very foundation of science will be shaken. When foundations are shaken, if they are built on sand, they will crumble. The day is coming!*** ... Clearly, something is coming that will challenge the very concept of reality itself and will involve God's Son and science. I suspect that something will transpire prior to or during this crisis that, most likely, could (or: will) lead the many into a false or deceptive paradigm that denies and rejects the one who is reality. But why the word *metaphysical*? Some might argue this can't be from God, for our focus must be on **spiritual revelation**, not the metaphysical. If you are in this camp, don't be so quick to come to this conclusion until you have some understanding of the word itself. So, what is the meaning of metaphysical?

To answer this last question in full, you are referred to the above link. However, one of the definitions of *metaphysics* refers to *the study of being and existence, including the definition and classification of entities, physical or mental, the nature of their properties, and the nature of change*. Some of the purported explanations could lead to an **existential crisis** challenging the very concepts of a creator and the nature of man in relation to the universe and reality. Some higher-ups in one religion (left unnamed) believe aliens are our creators (plural), and humans are about to meet them.

I'm not proposing any of these at the moment (although the Nazi one is intriguing). It's all speculation at this point. However, something big is coming. Can you imagine how some of these speculations could be spun and thrust upon an acquiescent and naive public (already primed by a pandemic and masks), through an orchestrated event in an attempt to alter the course of history or the very nature of humans? Or, what if what is coming is so real to the point of challenging the very history (origins) and future of humans and this earth? It's possible (not a given) that UFOs could become a setup or, at least, the primer for some extremely significant *crisis* event (real or not). Here's the point and the warning.

**Currents events are leading to a metaphysical crisis pertaining to what is real and what is not that will shake science and even rattle some Christian theology and eschatology.** We must have **spiritual intelligence** in order to navigate the days ahead, and this comes from only one source—**our Head, the Lord Jesus, the one in whom all things have been created and through whom all things exist**. So, be warned; of the many realities of life, there is one that matters most. **His name is [JESUS!](#)**
